Method 12 Keep Apple Music Songs Free Forever (Recommend!)

All the methods mentioned above work for a maximum of 6 months. After the free trial, you must pay for a flat fee to unlock access to Apple Music's entire library. But note that the audio files do not reside on your devices locally; you're instead just listening to tracks stored remotely owned by Apple. Here's an ultimate workaround if you'd like to keep Apple Music tracks forever for unlimited playback. You can download Apple Music songs as offline audio using this groundbreaking AudiCable Apple Music Recorder. The downloaded audio files of Apple Music are stored on your PC, allowing regular playing on any other MP3 player or audial device.

Tool Required: AudiCable Apple Music Recorder

AudiCable Apple Music Recorder is born to download songs, playlists, albums, podcasts, and audiobooks from Apple Music to PC. Adjusting the output parameters, this tool effortlessly converts Apple Music tracks to MP3, AAC, WAV, FLAC, AIFF, or ALAC, with all music metadata information preserved. After recording, you'll quickly locate the lossless audio files of Apple Music in the local folder, and even you can transfer them to MP3 players, smart speakers, or the car via a USB drive.

AudiCable also features all-in-one music recording, which supports extracting music from most music sources, including Spotify, Amazon Music, Tidal, and YouTube Music.

💡Tutorial on Downloading Apple Music Offline for Free Playback

AudiCable Audio Recorder supports running under both Windows and Mac systems. In this tutorial, we'll use the Mac version of AudiCable to show you how to download Apple Music as local audio. Please install AudiCable first, as required by your operating system.

Step 1 Adjust the Output Format as MP3

Launch AudiCable program on your computer first. Click a "gear icon", here you can freely customize the output format, output quality, output path and more output parameters as you like. Then close it to apply the changes.

Step 2 Choose Apple Music as Output Source

Choose "Apple Music" as the output music source on the main interface. Then please log in your Apple Music account, when the web player of Apple Music pops up.

Step 3 Start Downloading Apple Music Songs

Play a song/playlist/album you want to download from Apple Music. AudiCable will record Apple Music songs simultaneously as soon as you play them. If you want to enable the music to download in the background, you can go to the upper right, and tap the "sound" icon to switch to mute.

Step 4 Check Downloaded Apple Music Songs

When the recording is finished, go to the "Recorded" menu. Here you can find all the Apple Music songs that have been converted successfully. Click the "Folder" icon beside the music and you'll be directed to the downloaded MP3 files of Apple Music.

Now you can keep the downloaded iTunes tracks playable forever even if you cancle the subscription. You can also transfer the converted audio to any device for offline listening.

Wrapping It Up

Now that you know how to get Apple Music for free, you can start planning to use one of the strategies and cutting costs immediately. It is worth noting that these promos are time-limited, thus you're required to redeem them during the specified validity. For detailed redemption conditions and constraints, you should go to the official offer page.

Alternatively, If 6 months offer isn't enough, and you want to enjoy your Apple Music songs a bit longer, try the last yet the ultimate workaround - keep Apple Music songs permanently after unsubscribing. The required tool is AudiCable Apple Music Recorder, which helps you save iTunes songs to lossless local audio.
